

# THE ATOM

MADE WITH A BIG BANG

## pinot noir

— california —

Ah, wine! Deceptively simple in chemistry yet infinitely complex in sensory experience.

Composed of atoms yet equally composed by time. There are only 9 atoms in alcohol. The winemaking process is but 4 steps. Yet with the passage of time in both barrel and bottle, complexity is revealed. 800+ aromas to detect, 100+ unique flavors to taste. 1 perfect bottle for you. Consider the atom.

The Atom California Pinot Noir – a captivating expression of California's terroir. Our grapes are carefully handpicked at optimal ripeness, then gently pressed and fermented with precision. This elegant wine opens with inviting aromas of ripe strawberry, luscious cherry, fresh blackberry, and a delicate hint of caramel. On the palate, indulge in flavors of succulent black cherry, velvety strawberry jam, a touch of brown sugar sweetness, all complemented by subtle oak undertones. The well-balanced acidity and silky tannins lead to a sophisticated and lingering finish that will leave you yearning for another sip.
