THE ATOM

MADE WITH A BIG BANG

cabernet sauvignon

california

Ah, wine! Deceptively simple in chemistry
yet infinitely complex in sensory experience.
Composed of atoms yet equally composed by time.
There are only 9 atoms in alcohol. The winemaking process
is but 4 steps. Yet with the passage of time in both barrel
and bottle, complexity is revealed. 800+ aromas to detect,
100+ unique flavors to taste. 1 perfect bottle for you.
Consider the atom.

DOWN THE AISLE

We harvest clusters at ideal ripeness & combine them
at the press before a slow, meticulous fermentation.
Our California Cabernet Sauvignon has aromas of plum
and dark berries, with chocolate and notes of spice and
pepper. On the palate, there are flavors of ripe dark fruit
& red cherry. Balanced acidity and velvety plush tannins
lead to an elegant and satisfying finish.
